PROFESSIONAL SUMMARY

Flutter developer with 4+ years of hands-on experience building cross-platform iOS and Android applications for clients across Egypt, UAE, Saudi Arabia, and the USA. Specializes in real-time data architectures, state management, offline-first solutions, and scalable mobile UIs. Top Rated on Upwork with a proven track record of delivering production apps in healthcare, food and beverage, government, and fintech sectors.

EXPERIENCE

Flutter Developer • Contract — [Colada](#) | Saudi Arabia (Remote)

January 2026 – Present

[Google Play](#) · [App Store](#)

Building a cross-platform Flutter app (50K+ downloads, 1,000+ active deals across Riyadh) that helps users discover the best offers, discounts, and deals at restaurants and cafes.

- Cut cold-start time roughly in half (~28–30s → ~13–16s) by eliminating duplicate API calls and parallelizing independent requests — 24 → 17 total requests.
- Built core features end-to-end, including a coupons and cashback system and a coffee subscription flow.
- Integrated Meta Ads for user acquisition; delivered scalable, maintainable Flutter UIs for iOS and Android.

Software Engineer • Full-Time — [Memory Chat](#) | Alexandria, Egypt (Remote)

June 2025 – Present

[Google Play](#)

Own the full software lifecycle — development, database design (Supabase / PostgreSQL), and mobile application quality — for a cross-platform productivity app built on a zero-knowledge encryption architecture.

- Cut login time 66% (~21s → ~7s) by migrating RSA key generation from Dart to a native Go library (~7s → ~200ms).
- Eliminated redundant round-trips by replacing repeated queries with upserts and parallelizing sequential calls.
- Designed secure, cross-device data flows for encrypted user data.

Flutter Developer • Part-Time — [Priceless Medical](#) | UAE (Remote)

July 2025 – March 2026

[Google Play](#) · [App Store](#)

- Delivered new features including DeepLinks, in-app Subscriptions, and Stripe payment integration for the UAE's first smart healthcare savings platform.
- Maintained and optimized the app serving 30+ partner clinics and hospitals across the UAE.

Flutter Developer • Contract — [TopProz](#) | USA, California (Remote)

June 2025 – September 2025

- Built a local storage layer that lets users keep using the app normally without a network connection, persisting data on-device for offline access.
- Developed cross-platform features for Android and iOS and integrated REST APIs.

Flutter Developer • Full-Time — [MDARJ](#) (Software House) | Alexandria, Egypt

April 2024 – June 2025

- Built Tansieq, a large-scale Flutter application for Saudi Arabia's Ministry of Hajj — a drone/visual detection system for monitoring camps, tents, and infrastructure and reporting issues across Hajj sites.
- Implemented core app features and applied MVVM and BLoC architecture to keep a large, complex codebase maintainable.

SKILLS

Mobile Development: Flutter, Dart, State Management (BLoC, Cubit, Riverpod, Provider, GetX), MVVM, Animations, Localization, Deep Links, Push Notifications (FCM), In-App Purchases, Stripe

Backend & Databases: Node.js, Express.js, Supabase (PostgreSQL), Firebase, Drift ORM, PowerSync, RESTful APIs

Testing: Flutter Test (Unit & Widget Testing), Integration Testing, Mockito, flutter_mockito

DevOps & CI/CD: GitHub Actions, Codemagic, Automated Build & Deployment Pipelines, App Store Connect, Google Play Console, Git, Docker

AI Automation: N8N, AI Agents, RAGs, Hosting

Architecture: Clean Architecture, SOLID Principles, OOP, Design Patterns, Data Structures, Offline-First, Real-Time Data

Project Management: Jira, Trello, Plane, Monday, Glean, Agile, Scrum

Networking: CCNA (Cisco Certified), TCP/IP

EDUCATION

B.Sc. Computing and Data Science — Alexandria University | Alexandria, Egypt *October 2021 – June 2025*
– Faculty of Computing and Data Science

CCNA Network Certificate — NTI / Creativa — Cisco | Alexandria, Egypt *September 2023 – November 2023*

LANGUAGES

Arabic — Native **English** — Fluent
