PROFESSIONAL SUMMARY

Flutter developer with **4+** years building and shipping production iOS and Android apps for clients across the UAE, Saudi Arabia, and the USA. **Top Rated on Upwork**, specializing in offline-first architecture, real-time data sync, and clean, pixel-accurate UI for bilingual Arabic/English audiences. Experienced **architecting multi-flavor builds with per-brand Firebase configurations**, and **mentoring junior developers** through code review and technical documentation.

EXPERIENCE

Flutter Developer • Full-Time — Colada | Saudi Arabia (Remote) January 2026 – Present

Building a cross-platform Flutter app (**100K+** iOS & **50K+** Android downloads, **1,000+** active deals across Riyadh) that helps users discover the best offers, discounts, and deals at restaurants and cafes.

- Cut cold-start time **~50%** (**~28-30s** → **~13-16s**) by deduplicating and parallelizing API calls (**24** → **17**).
- Built core features end-to-end, including a coupons and cashback system and a coffee subscription flow.

Software Engineer • Side Project — Memory Chat | Alexandria, Egypt (Remote) June 2025 – Present

Own the full software development lifecycle — design, development, testing, deployment, and maintenance — including database design (Supabase / PostgreSQL) for a cross-platform productivity app built on a zero-knowledge encryption architecture.

- Cut login time **~66%** (**~21s** → **~7s**) by migrating RSA key generation from Dart to native Go (**7s** → **200ms**).
- Architected state management with BLoC and Clean Architecture (UI, domain/use cases, and data layers), and shipped **multi-flavor** builds with per-brand Firebase configurations (assets, store identifiers, environments).
- Mentored **2 junior** developers and led technical documentation efforts to accelerate onboarding and maintain code quality.

Flutter Developer • Part-Time — Priceless Medical | UAE (Remote) July 2025 – March 2026

- Delivered new features including DeepLinks, in-app Subscriptions, and Stripe payment integration for the UAE's first smart healthcare savings platform.
- Maintained and optimized the app serving **30+** partner clinics and hospitals across the UAE.

Flutter Developer • Full-Time — TopProz | USA, California (Remote) June 2025 – September 2025

- Built a local storage layer so field users working in low-connectivity or offline locations could keep using the app normally, persisting data on-device until the connection returned.
- Developed cross-platform features for Android and iOS and integrated REST APIs.
- Diagnosed and repaired existing app modules, fixing regressions surfaced through manual testing before release.

SKILLS

Mobile Development: Flutter, Flutter Web, Dart (Null Safety), Kotlin, Swift (Platform Channels), State Management (BLoC, Cubit, Riverpod, Provider), Navigation (go_router), MVVM, Material 3 & Cupertino, Animations, Localization, Deep Links, Push Notifications (FCM), In-App Purchases, Stripe

Backend & Databases: Node.js, Express.js, Supabase (PostgreSQL), Firebase, Drift ORM, Hive, PowerSync, Dio, RESTful APIs, SQL, NoSQL

Testing: Flutter Test (Unit & Widget Testing), Integration Testing, Manual Test

CI/CD: GitHub Actions, Fastlane, Automated Build & Deployment Pipelines, App Store Connect, Google Play Console, Git

AI-Assisted Development: Claude, Cursor

Third-Party Tools: Sentry, Gleap, Bugsee, Crashlytics, Shake, AppsFlyer

Architecture: Clean Architecture, SOLID Principles, OOP, Design Patterns, Dependency Injection (get_it, injectable), Data Structures, Offline-First, Real-Time Data, Performance Optimization

Project Management: Jira, Trello, Plane, Monday, Agile, Scrum

PROJECTS

Colada — deal-discovery Flutter app for restaurants and cafes in Saudi Arabia, with **100K+** iOS and **50K+** Android downloads and **1,000+** active deals across Riyadh. [Google Play](#) · [App Store](#)

Memory Chat — cross-platform productivity app built on a zero-knowledge encryption architecture with secure, cross-device sync. [Google Play](#)

Priceless Medical — UAE's first smart healthcare savings platform, serving **30+** partner clinics and hospitals. [Google Play](#) · [App Store](#)

custom_media_picker — open-source Flutter package for picking images/videos via native Android (Kotlin) and iOS (Swift) platform channels. [pub.dev](#)

EDUCATION

B.Sc. Computing and Data Science — Alexandria University | Alexandria, Egypt *October 2021 – June 2025*

- Faculty of Computing and Data Science

CCNA Network Certificate — NTI / Creativa — Cisco | Alexandria, Egypt *September 2023 – November 2023*

LANGUAGES

Arabic — Native **English** — Fluent
